CAROLINE LE VAILLANT
36 years – French – SG employee since 2007
Business School - Master's degree in Banking/Finance
Business Development & Partnership
Objective: Contribute on building the bank of tomorrow

Ambitions:

As an employee of Societe Generale since 13 years, I want to commit, along with Jérôme LEPAGNOL as a member, as employee shareholder representative to the Société Générale Board of Directors.
Banking industry evolves, ambitions of the bank and expectations of the employees as well. We have to serve everyone's interests to move forward together, on a long term basis.
By applying to this position, I bring my internal knowledge of the Group, complementary with Jérôme's one:

- A mix of experiences acquired at the HQ with interactions with local offices and subsidiaries, in France and abroad, and missions within many BUs
- And a field experience, working on a daily basis with distribution networks

Our motivations for this role at the Board of Directors :

- Embody the banks' businesses of tomorrow (by innovating with responsibility) and also the way of developing them by the strength of our networks, in France and abroad, by providing our skills and our vision of the world
- Ensure a direct and non-biased link between the fields (network, subsidiaries, HQ either SU or BU) and the governing body of the bank (Board of directors and general management)
- Reconcile strategic decisions towards work compensation and capital income : both of them are necessary to the other: let's make them work in symbiosis, no need for opposition.
