Manifesto
ARSA Societe Generale

August 2020

Candidate Jérôme Lepagnol

Alternate member: Caroline Le Vaillant

Internet page explaining our candidacy: https://lepagnol.github.io

With our various experiences within the bank, we were able to apprehend different fields of skills: sales, originate to distribute, risks, accounting, compliance, systems (IT), financing, communication and project management. Thus, we are in a position to accompany changes that will help building tomorrow's bank. Our current positions demonstrate the ongoing transformation in our company:

- Certified Data scientist in the Risk department
- Business developer in a fintech dedicated to financing CSR assets (Societe Generale has the ambition of becoming THE bank of the energetic transition).

Our ambition: **Contribute on building the bank of tomorrow**

1. We do fully support SG's purpose: "**Building together**, with our clients **a better and sustainable future** through **responsible and innovative** financial solutions."
2. **Protect** the value(s) of our clients and develop confidence of our ecosystems by public exemplariness of employees and management
3. Contribute to the changing world by promoting responsible choices for environment (**our common wealth**) on a long term basis

Our motivations for the role:

- Embody the banks' businesses of tomorrow and also the way of developing them by the strength of our networks, in France and abroad, by providing our skills and our vision of the world
- Ensure a direct and non-biased link between the fields (network, subsidiaries, HQ either SU or BU) and the governing body of the bank (Board of directors and general management)
- Reconcile strategic decisions towards work compensation and capital income : both of them is necessary to the other : let's make them work in symbiosis, no need for opposition.

I take the commitment to donate a significant part of director's fees to a charity providing social help and services.
